

Human Factors In Action

at

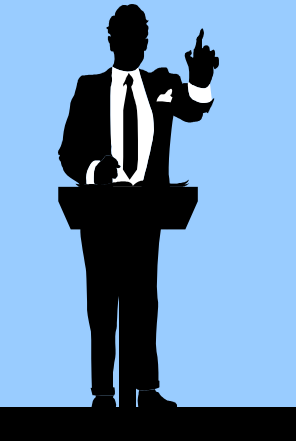

CATCH, Redwood Park Estate,
Stallingborough, Grimsby DN41 8TH.

COURSE DESCRIPTION

A short, practical introduction to human and organisational factors in Health & Safety delivered through a blend of expert input, group work and practical involvement on a pilot process plant.

Date: 5th October 2011 Times: 08:30 to 16.30

COURSE OBJECTIVES: -

The course will use CATCH's pilot process plant for a range of practical activities, and will...

- Outline the main human factors topic areas relevant to health & safety, and other types of performance.
- Explain the UK health & safety regulator's approach.
- Show how good management and supervision of human factors can enhance reliability and performance through people.
- Illustrate a range of proven human factors intervention strategies, tools and techniques.
- Provide supporting materials for education and performance improvement.

DELEGATE PROFILE

This course will be of interest to Operations & Maintenance Managers and Supervisors, and HSE professionals from the process industries. The content is equally relevant to those working for operating or contracting companies.
